FOOD PRODUCTION AND GREENHOUSE GAS EMISSIONS

FEED CONVERSION RATIO

Estimated feed required to gain one pound of body mass.

We are in a right business...

GLOBAL and **SEAFOOD**
FISHERY FORUM **EXPO RUSSIA**
FISHERY • AQUACULTURE • PROCESSING

Nutrient (P and N) load: **92% less than in** traditional fishfarming

100% of fish used
100% of related waste further processed (organic fertilizers)
0% waste to dump

Fresh water usage:
99% less than in traditional fishfarming

... but how to avoid being the next "combustion engine" of history?

The Varkaus
FF2 Gigafactory,
3Mkg unit
