## Ilya Shestakov

Head of the Federal Fishery Agency

### Dear Ladies and Gentlemen,

Welcome to the IV Global Fishery Forum and Seafood Expo Russia!

Having survived the COVID-19 pandemic, the global fishing industry is today operating under new conditions. The steps taken at all levels have enabled new sanitary standards to be introduced and enterprises to function normally. At the same time, the changes taking place require a rethinking of development strategies and traditional operating regimes.

According to the UN Food and Agriculture Organisation (FAO), crew quarantine restrictions and other problems reduced catches throughout the world in 2020 and world aquaculture production fell for the first time in several years. Changes in consumer demand and logistics disruptions owing to closed borders brought about market shrinkage and a drop in market player incomes.

So, at our already traditional event venue, we are planning to discuss indicative case studies and proposals for developing the fishery industry during quarantines. The key issues include how to track and properly store supplies along the entire chain,

how to promote output on different markets and decide which technologies to invest in. Today's new quality and safety standards are often associated with a need to renew fixed assets, apply innovative robotisation and digitalisation solutions and integrate information systems into the physical infrastructure. We will focus particularly on collaborating with the younger generation: how to counter the falling demand for fish and attract personnel. We will talk about what the fishing industry complex can offer Generation Z as an employer.

After a year's break, Russia's biggest international fishing industry exhibition will be working full out. The over 26,000 sq.m. area will accommodate more than 350 companies engaged in fish catching, farming and processing, ship building and repair, production of equipment for the industry, logistics and retail.

I am sure the event programme will be both interesting and useful for all fishery and related sector professionals. I wish all participants fruitful work, new business contacts and successful implementation of their plans!

# MAKSIMIKHA

Food production and distribution cluster

Cluster total area

**103 ha**

Commercial areas

**429 000 sq.m**

124 000 sq.m of them  
will be in the operation at Stage 1

Food Production and Distribution Cluster Maksimikha is the major logistics and food production cluster focused on interaction of retail chains and suppliers in the main categories of fresh food:

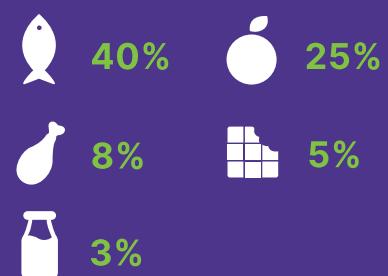

- **Warehouses and production facilities park** for manufacturers and suppliers with the possibility of delivery to the federal and regional retail chains DC
- **Export & import hub** for key food supply chains
- **Operations outsourcing** - warehouse, transport logistics, customs operations and value added 3PL services

Commercial Director  
KARTASHOV Pavel

# N E R E Y

All fish of the Far East

Trading Company Nerey LLC is the biggest distributor of frozen fish from the Russian Far East. For more than 20 years we have occupied a leading position among frozen fish suppliers to Russian market, CIS and Asian countries. We provide a full range of services such as checking fish quality, completing accompanying documents and delivery.

Our company will be your personal representative in the Russian Far East!

## Envisioning the future of marine resources

Utilizing our exclusive technology that distinguishes fish species and size,  
we are revolutionizing the fishing industry,  
while also helping sustain the abundant marine environment.

*CHALLENGE the INVISIBLE.*

**FURUNO**

Choose quality, choose

①

② 40 min.

③ 80 min.

- All ice production is on board
- Shelf life increases by 5-7 days
- Significantly faster down cooling
- Rapid and efficient cooling
- Decreases macro bacteria formations
- The liquid ice completely enwraps the catch

# List of Exhibitors by Product Index

# Cold is Gold!

To maximise product quality it is vital to use correct handling from the first moment.  
Using the right products separates the excellent product from the good.

One of the key challenges facing food producers is to get their produce to the customer as freshly as possible.

In cooperation with scientists and designers, we at Sæplast have emphasised our focus on producing high quality containers that maintain produce at low temperatures better than any others!

It is vital when it comes to freshness to chill the produce immediately and to maintain at a constant low temperature to achieve top prices for the producer and high quality fresh food for the consumer. A quality that is lost is never re-gained.

**It is cold hard fact that Sæplast containers deliver in these areas and can be used for everyone's benefit from processor to consumer!**

**sæplast®**
